

RfsProtech

Model DRS 300 Wood Repair System

ogden group

Give Nature A Helping Hand!

Increase your profit with the new RfsProtech Wood Repair System.

This simple patching system fills defects such as knots and cracks in seconds with minimal waste of the patching material. Using the laser cross hairs, the wood parts are positioned under the injection head, according to the defect location. The hot patch solution is injected with pressure into the defect.

- **Wood Repair System**
